

Urgent homework for the working groups (with contact name)

Gamma-jet measurements - **Saskia Mioduszewski**

Thresholds

Rates

Backgrounds

Charm tagged jets (J/ψ) – **Tony Frawley**

Thresholds

Rates

Intermediate and low mass dilepton spectra - **Gabor David**

Theory input – talk to theorists and get model predictions

Can discriminate experimentally?

Can identify signatures of chiral symmetry restoration?

If not, what can you learn?

Asymmetric systems - **Julia Velkovska**

Collision geometry, acceptances, species, optimisation

Upsilon mass resolution in STAR – **Thomas Ullrich**

χ_c efficiency and backgrounds in PHENIX and STAR – **Tony F., Thomas Ullrich**

Quark jets at high p_T at RHIC – rates **Xin-Nian Wang**
